

MCC Group Cell (MCCgc)

Philosophy

If it's lonely at the top, it means you are not doing something right. Wherever you find yourself, do not just be a team-mate – be a friend to those you work with. Friendship is the shelter against sudden storms and even after you have achieved your goals, what you will remember the most is the feeling of teamwork and friendship you experienced along the way and you still share.

Those closest to the leader, determines the success level of the leader and I know that although I have the dream to see people whose lives are turned around totally in the upcoming 365days, how well YOU perform inevitably will determine how well I perform.

Over the last couple of years, I have discovered that most people don't "DO" what they are taught. For instance, how many books have you bought with your money that you still have lying around somewhere in your house "unread", how many seminars have you attended that the notes still lie in the glove compartment of your car etc

Truth be told.. life doesn't respond to knowledge. Even the mere fact that you read it does not mean it will work for you. It is the application of your knowledge that produces results and I believe everyone in MCC should be a part of making everyone else to act.

MCCgc Overview

The MCCgc is simply a smaller compartment of the MCC and there shall be 37 cell groups each consisting of 10members each. (At the time of this writing, only about 210 people have shown strong enough interest in MCC, which means we shall have only 20 cell groups – I believe others will join us later).

Members will have no control on the cell group they are assigned and the members of each group are expected to meet each other, choose a leader and assistant leader and work together within the group.

MCCgc Rules

1. As payments are made and registrations done, all MCC members will be put into cells (1-37) majorly based on their location, and present occupation.
2. Each group is expected to pick a cell leader and assistant (contact info of your other cell members will be provided)
3. We shall create a public system of interaction within cell members so that other cell groups can peep into your discussions and also contribute.
4. There will be special training sessions on public holidays which you CAN only attend at the office with your cell group members.
5. Overall performance within your group will determine what insider secrets for making money will be further revealed to your group ahead of the other groups in special trainings.
6. After the first 6months in MCC, every cell group is expected to submit a business proposal that is capable of earning at least N100,000 in profit a week following a set of trainings all members will receive. (This is a group work).
7. You are responsible for cell members within your group. If other cell members are not doing well, I will query all of you as a group and if I do not get a satisfactory explanation, will carry out disciplinary actions against all of you.
8. If more than 4 members of a group are simultaneously not doing well, and nothing is done by the group about it, then the membership of all group members is liable to be questioned with disciplinary actions.
9. Each cell MUST come up with a seminar (either free or paid) where they teach others what they have learnt in any part of the country. I will try to attend most of these seminars personally.
10. Teach your success. I understand that sometimes your business secrets will want to be kept a secret. I do this also but try and find a way to at least give something back to other members – this is not a rule. Just a humble request.

NOTE: Over the last 7years, I have come to learn how deeply important it is to have people around you whom you grow together in any business you do & I know that when you start out on your own, you will be grateful I am instituting this.

These rules are not open to discussion... please ride with it for now. If there is a need to amend it, I will do so myself.
